

S. 2166 – Endangered Fish Recovery Programs Extension Act:

Originally created in 1988 over concern for four endangered fish, the Upper Colorado Endangered Fish Recovery Implementation Program has been extended multiple times over the last 30 years, most recently in 2013. The science-based, basin wide approach this program has taken have precluded any lawsuits being filed despite the diverse stakeholder group involved. This legislation will extend the authorization of the program through 2023.
