

S. 287 – To update the map of, and modify the maximum acreage available for inclusion in, the Florissant Fossil Beds National Monument:

The park is currently capped in its size at 6,000 acres. However, a local conservation group has taken 280 acres of private land adjacent to the existing park in to trust and the park has received support from the local community to incorporate the parcel in to the park. This legislation revises the monument designation to incorporate the additional 280-acre parcel.
